

White Paper

Infinity Crypto Token (ICT)

<https://infinitycryptotoken.com>

Introduction

Token Name: Infinity Crypto Token (ICT)

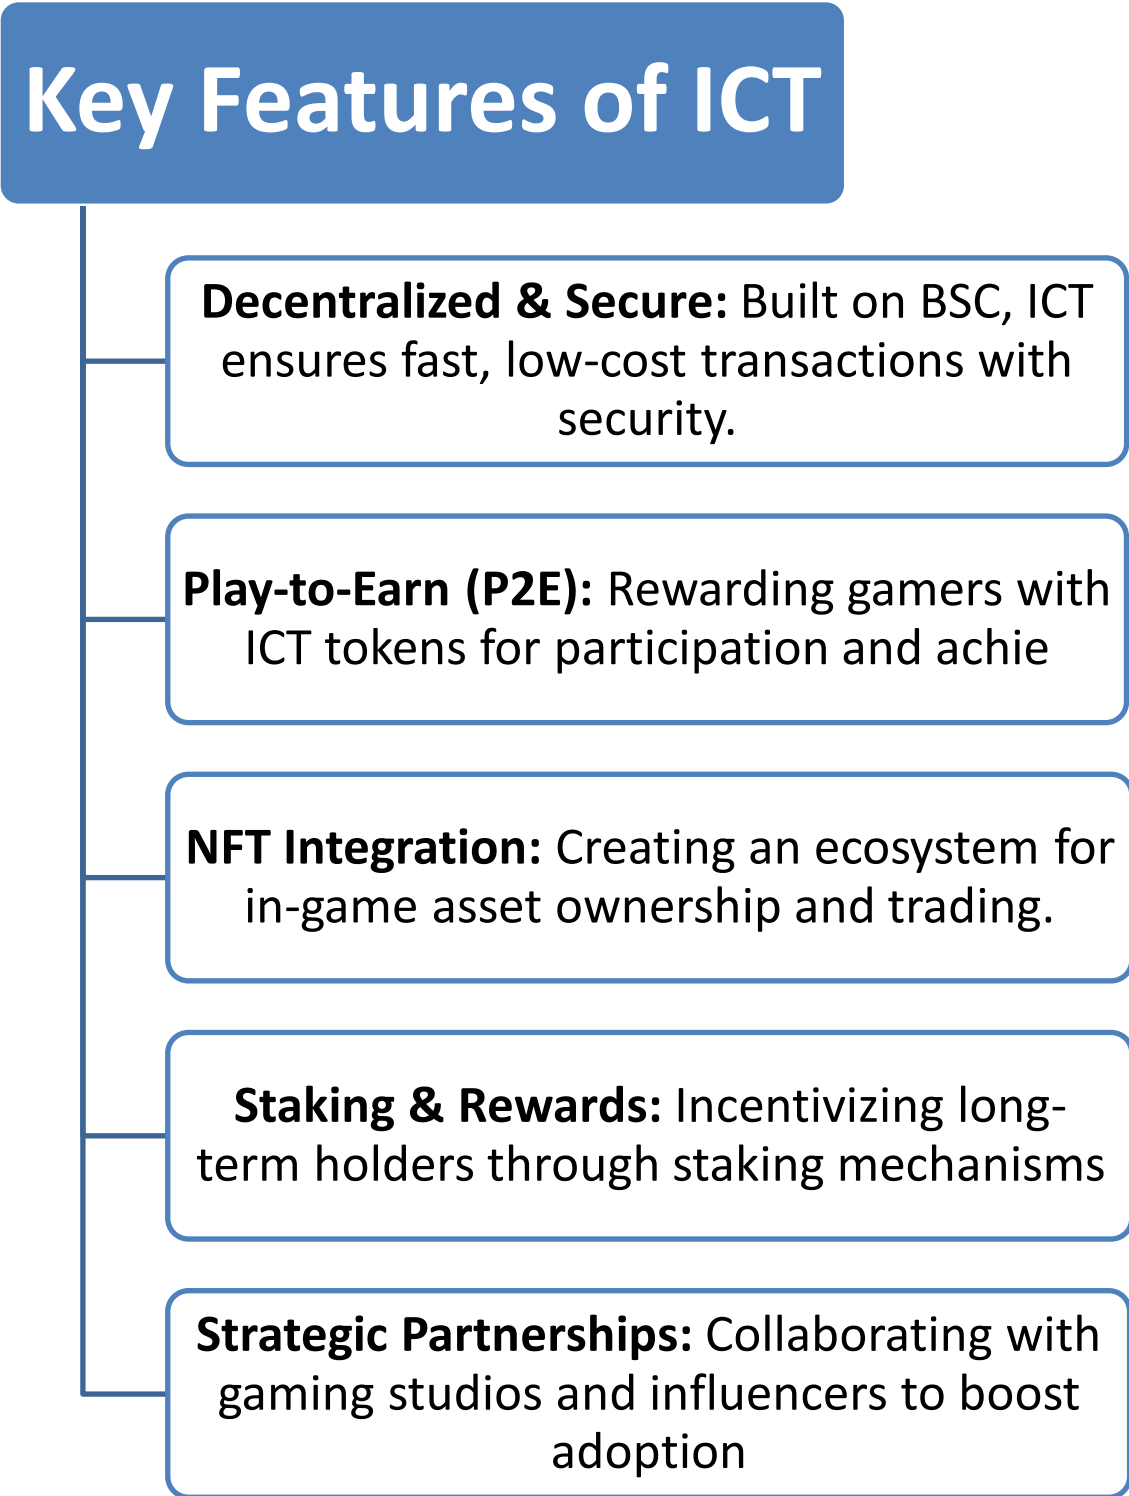

Token Standard: BEP-20

Total Supply: 20,000,000 ICT

Accepted Payment: BNB, USDT

Infinity Crypto Token (ICT) is a blockchain-based gaming token designed to power a Play-to-Earn (P2E) gaming ecosystem. Built on the Binance Smart Chain (BSC) as a BEP-20 token, ICT aims to provide seamless transactions, staking rewards, and an NFT marketplace. The project integrates decentralized finance (DeFi) principles with gaming to create a sustainable and engaging ecosystem.

Key Features of ICT

```
graph TD; A[Key Features of ICT] --- B[Decentralized & Secure]; A --- C[Play-to-Earn P2E]; A --- D[NFT Integration]; A --- E[Staking & Rewards]; A --- F[Strategic Partnerships];
```

Decentralized & Secure: Built on BSC, ICT ensures fast, low-cost transactions with security.

Play-to-Earn (P2E): Rewarding gamers with ICT tokens for participation and achievement.

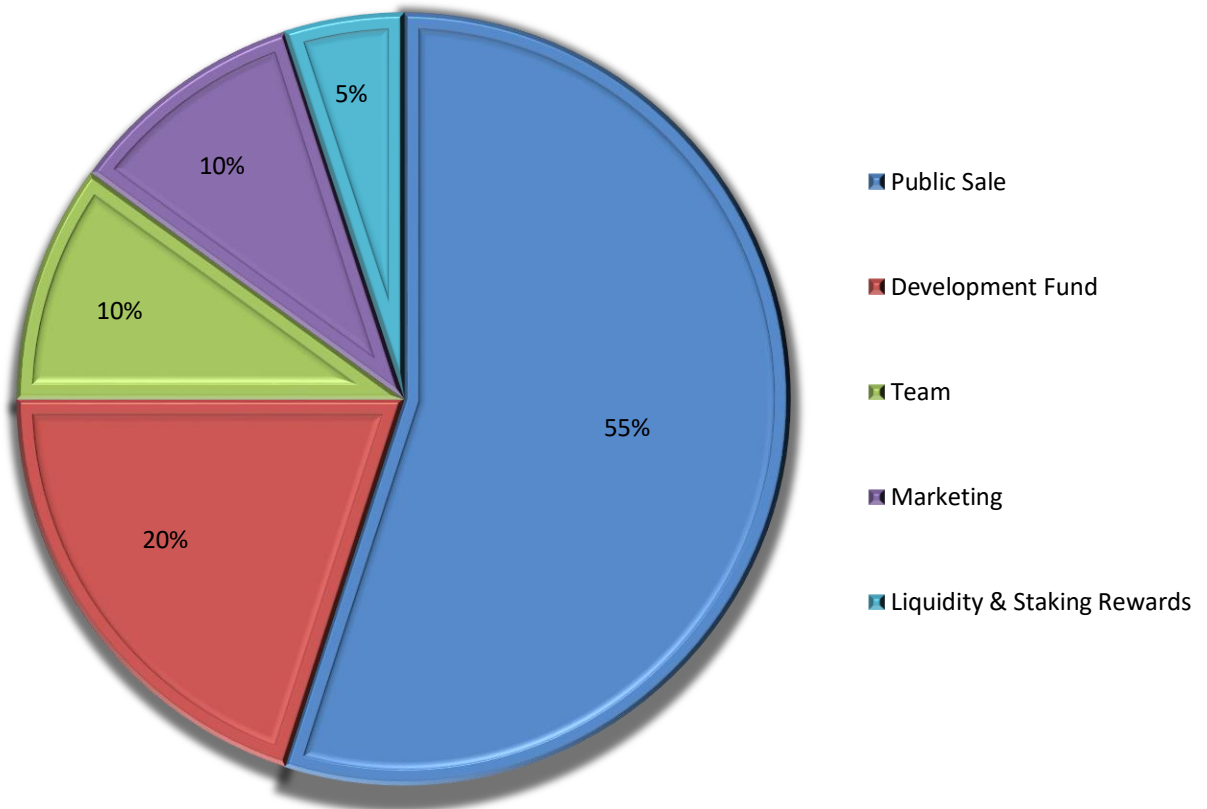

NFT Integration: Creating an ecosystem for in-game asset ownership and trading.

Staking & Rewards: Incentivizing long-term holders through staking mechanisms.

Strategic Partnerships: Collaborating with gaming studios and influencers to boost adoption.

Tokenomics

Token Distribution

Project Roadmap

Phase 1 (Q1-2025): Foundation & Launch

- Concept finalization and project planning.
- Launch of the official website.
- Release of the whitepaper detailing tokenomics, vision, and roadmap.
- Smart contract deployment.
- Community Building – Growing social media presence.
- Pre-Sale & Private Sale – Raising initial funds through early investors.

Phase 2 (Q2 - Q3 2025): Exchange Listings

- Public Sale & DEX Listing (PancakeSwap, etc.).
- Listing on CoinMarketCap (CMC) & CoinGecko (CG).
- Launch of Staking & Rewards System to incentivize holders.
- First CEX Listing on mid-tier exchanges.
- Strategic partnerships with gaming projects & crypto influencers

Phase 3 (Q4 2025 - Q1 2026): Gaming Ecosystem Development

- Start of Game Development with Play-to-Earn (P2E) model
- Beta testing and integration of NFT-based in-game assets
- Release of game trailer & early access demo
- Expanded marketing campaigns leveraging YouTube, Twitter, and influencers

Phase 4: Expansion

- Official launch of Game (v1.0) with in-game ICT rewards
- NFT Marketplace launch for trading in-game items
- Expansion to Centralized Exchanges
- Expansion to mobile gaming & real-world applications
